

Jig & Tool Protector

Anti spatter

Jig & Tool Protector is a ceramic coating for tips, nozzles, etc. to protect against spatter in MIG/ MAG welding and plasma/laser cutting. Improved recipe makes it best in class.

- Excellent separating effect
- Silicone-free and water-free
- Suitable for later painting or galvanizing of the workpiece
- High productivity

Visit **esab.com** for more information.

Left to Right: Applied to nozzle; Nozzle view after welding; nozzle removed from gun and minimum spatter.

Industry

- Automotive
- Heavy Fabrication
- Railcars

Specifications

Volume	400 ml
Appearance	White, Liquid
Odor	Typical
PH Value	8 – 9.5
Solubility	Water soluble
